6. End

Finally, after six posts, one longer than the others, we reached the end of the ManiaPlanet ManiaLinks Tutorial. Now it is up to you, to take this concentrated knowledge, and to apply it to your own ManiaLinks in ManiaPlanet. Of course I would like to see any feedback to the tutorial, regardless if you only want to thank for it or have some suggestions or found some errors in the tutorial.

In the very last paragraph, I want to thanks all of those, who supported me with the tutorial, next to Nadeo of course all who helped me in the forums, too. Special thanks go to FT»kastun, seeba and destroflyer, which critically read the tutorial and pointed out all the errors, next to helping me getting the very last detail to be inserted into it. Without the support, the tutorial would never have been as big as it is now.

That's it, now is your turn.
FT»Marcel
